Aim :-

Create a cloning of VM and test it by loading the previous version.

Procedure :-

→ Some Steps to create a cloning of VM ware.

→ Download VM ware workstation.

→ Open it

→ click On.

→ Open the previous Created VM.

→ Then it displayed the details.

→ Go to top screen.

→ Selected VM.

→ Click it.

→ Show many options line.

→   Φ → Power

     ⬚ → Snapshot

     ℘ → Manage

     ⬚ → Settings.

→ Click on Manage

→ Shows Options.

     ⬚ Settings.

     ⬚ → clone.

☐⊠ → Delete.

☐ → Manage.

→ click clone.

→ Next

→ choose Option from current state.

→ CVext

→ Enter VM name

→ Finish it & close.

Output :- →

☐ clone of ubuntu 64-bit.

VM Ware

▼ Virtual Machine Details :

    state : Powered off

    Configuration : c:|user|admin|one drive |Documents|
                 VM| clone of ubuntu 64-bit . Vmx

H/w Capability : Workstation beta VM .

clon of : c:|users|admin\one drive \ Documents|vm.

Result :-   ubuntu 64-bit - Vmx

The cloning of VM has been successfull.
